PLANNED WORK SESSION

THE UNIVERSITY OF CHICAGO  
 5408 S. UNIVERSITY AVE.  
 CHICAGO, ILL. 60637  
 U.S.A.

• *Chlorophyll a* (Chl a) is the primary photosynthetic pigment in most plants and algae. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl a is essential for the light-dependent reactions of photosynthesis, where it converts light energy into chemical energy in the form of ATP and NADPH.
